Address Room#318 Sihwa Industrial Complex 4-Ba, Songgok-Dong, Ansan-Si, Gyeonggi-Do, Korea

Products Pneumatic Conveying System, Dryers, Mixers, Loaders, Chillers, Crushers

○ Products

▲ Heatron

A new concept dryer employing condensing Process

- Innovation energy efficiency(Energy saving by 50%-50Kg dehumidifying dryer)
- Cool down circulation air condenser(-18° C below), drain condensate.
- dual filter for longer lifecycle.

▲ PRIME DEHUMIDIFYING DRYER

Product Features

Perfect Air-Tight Circulation

Energy savings and a fast stable drying with a low dew point can be accomplished by completely isolating the dehumidifying air.

3-Tower Method

With a drying method of adding a freeze-line to the conventional 2-tower method, drying can be accomplished in a low temperature and the temperature variation is low.

Multi-function Operation and Warning

A convenient machine operation can be accomplished from the multi-function operation and warning system with the PID Temp Control.

Convenient Repair and Maintenance

Since all the parts are independently assembled, the repair and maintenance services are convenient.

▲ Hopper Loader

▲ Mighty Hopper Dryer

▲ Oven Dryer

▲ New Hopper Dryer

▲ Gravi Mixer

▲ Super Hopper Loader

▲ High Speed Crusher

▲ Low Speed Crusher

▲ KHAN MOLD TEMP. CONTROLLER

▲ MOLD AUTO CHILLER
